## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see Remarks, filed 4/21/08, with respect to the declaration under 37 C.F.R. 1.132 declaring that the related art disclosed in the instant specification is applicants' own work and has not been previously disclosed to the public is persuasive and the rejection of claims 1 and 5 under 35 U.S.C. 103(a) have been fully considered and are persuasive. The rejection of claims 1 and 5 under 35 U.S.C. 103(a) has been withdrawn.

### ***Allowable Subject Matter***

Claims 1 and 5 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art made of record and relied upon does not teach or fairly suggest a battery comprising an outermost current collector that is exposed on both sides such that the completely exposed current collector winds around the entire outer side of the electrode group of the battery and then an active material layer is present on an inner circumference side to form a single side exposed current collector such that the completely exposed current collector portion and the single side exposed current collector portion oppose each other but do not interpose the opposite pole current collector. The closest prior art of record is described in applicants' background section however the declaration filed 4/21/08 removes the background section of the instant specification as prior art and there is no other reference that teaches the instantly claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
